CHRYSANTHEMUM FRUTESCENS, MRS. F. SANDER

### New Chrysanthemum Frutescens or Marguerite. Mrs. F. Sander.

The most valuable flowering pot plant which has been offered to the trade since the introduction of the Lorraine Begonia, and which, like its predecessors, the French Marguerite and the later introductions, white and blush Queen Alexandra, will be grown extensively for cut flowers during the winter, while its pure white color will make it more valuable than any as a pot plant for Easter decorations.

Unlike all other Marguerites, its color is of the purest glistening white throughout; in size it frequently measures 5 inches across; the centre of the flower is a mass of closely arranged fringed florets; these are surrounded or edged by the broad, shining white ray petals, forming a flower which reminds one forcibly of a glorified double Pyrethrum. It is but rarely that a flower comes single, and when such is the case, they are as beautiful as the double forms; they are produced on long stems with a freedom not known in other varieties of the Marguerite.

We are prepared to book orders for delivery after September 15th for good 2½ inch pots at the reduced price of \$1.25 per dozen; \$8.00 per 100; \$75.00 per 1000.

### Nephrolepis W. K. Harris.

A strong growing form of Bostoniensis, splendid to grow into large specimens. The edges of the pinnae are wavy, giving it a graceful appearance. \$1.50 per doz.; \$10.00 per 100.

Specimens in 10-inch pans, ready October 15th, \$2.00 each.

## Fine Ferns of Special Merit

### Adiantum Croweanum.

We are the sole distributors of Mr. Crowe's stock of this valuable fern.

This is not only the best and most profitable Maiden-hair to grow for cutting, but it is also the best variety to recommend to the retail buyers for house culture, it standing the dry atmosphere of the room better than any variety we have yet tried.

Strong, 3-inch pots, \$2.00 per doz.; \$15.00 per 100; \$140.00 per 1000.

### Adiantum Hybridum.

Preferred by some growers to A. Croweanum. We have a large thrifty stock of 2 1/4-inch pots. 85 cts. per doz.; \$6.00 per 100; \$50.00 per 1000. Strong 4-inch pots, \$2.50 per doz.; \$20.00 per 100.

4-inch pots, 40 cts. each; \$4.00 per doz.

### Cibotium Schiedei.

We have this season the finest lot of Cibotiums that we have ever offered, the full line of sizes being in splendid condition and of excellent value.

8 " 2.50 each.	
10 " 3.50 to \$5.00 each.	
12 " 6.00 to 10.00 each.	

### Cyrtomium Rochfordianum (Crested Holly Fern).

A most important addition to our list of Ferns which will, when it becomes plentiful, undoubtedly displace the old so popular variety. Its foliage is not only of a richer, deeper, glossy green color, but the pinnae or leaflets besides being wavy or undulated are also deeply cut or toothed, giving the plant a graceful light appearance, which make it valuable not only as a dish Fern but as a specimen plant for decorative work and for apartment use. We had a limited number of 8-inch pans to offer this spring and these were quickly disposed of at \$5.00 each and many more could have been sold.

A limited lot of fine specimens ready October 25th in 6-inch pots. \$1.00 each.

### Pteris Childsii.

This beautiful variety is to Pteris what Farleyense is to Adiantums, and like that variety produces no spore, so that propagation is by the rather slow method of division, which will keep it a rare variety. The plant is of strong growth, attaining a height of about 20 inches; fronds large, pinnae deeply dentated and undulated, tips crested. Makes a beautiful specimen for exhibition.

Specimen plants, 6-inch pots, \$1.00 each.

### Pteris Wilsoni.

This is the most decorative of all the Pteris, a handsome crested form which is just as useful as a specimen plant as any variety of Nephrolepis, and in a small size a most desirable variety for fern dishes. 2 1/4-inch pots, \$3.50 per 100; 3-inch pots, \$6.00 per 100; 6-inch pans, \$35.00 per 100.

### New, Golden-leaved Selaginella Emiliana.

Selaginella Emiliana is one of the prettiest of the Selaginellas and is extensively grown for use in Fern-dishes as well as for individual specimens in connection with Ferns and other foliage plants. This variety has rich golden yellow foliage, very distinct and effective.

2 1/4-inch pots, \$1.50 per doz.; \$10.00 per 100.

## Dreer's Select Sweet Peas.

We offer below a select list of Orchid-flowered, Standard and Forcing Varieties, and while the list is a short one, it contains the very best kinds for Florists' use.

To those who wish to grow the finest Sweet Peas for early summer sales we recommend autumn sowing. About the end of November is the best time to sow in this latitude, and even should they winter kill, can be resown in early spring at little extra cost.
